

Datakey – Product Change Notification

PCN Number: 20210624
Notice Date: 24 June 2021
Notification Subject: Product Change Notification (PCN)

Summary Description:

DFX RUGGEDrive™ memory tokens provide SD card functionality in a proprietary form factor that is more robust than the standard SD card and microSD card form factors. Internally, the DFX memory tokens use SD memory that is compliant to the SD specification. When the SD memory used in the DFX memory tokens goes end-of-life (EOL), ATEK qualifies a replacement SD memory device and updates our bill of material using our ISO 9001 engineering change order (ECO) process. Such a change recently occurred with the Datakey DFX4GB RUGGEDrive memory tokens.

Affected Products:

DFX4GB RUGGEDrive Memory Tokens, Black

Part Numbers:

611-0209-000A

Details of Notice:

The SD memory used in the DFX4GB tokens has gone EOL. A replacement has already been qualified. The previous SD memory was compliant with the SD 2.0 specification, whereas the new SD memory is compliant with the SD 3.0 specification.

DFX4GB tokens with date codes of 6 – 1 (corresponding to June of 2021) or later will use the newly qualified SD memory that is compatible with SD version 3.0.

If you have any questions regarding this PCN, please contact the Datakey Customer Care Team.
